

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A method of reducing the odor emanating from feces deposited by a human making a bowel movement in a toilet, comprising the step of applying a liquid deodorizer to the toilet immediately prior to making the bowel movement, the liquid being applied as a spray consisting essentially of droplets having a maximum surface area of about $78 \times 10^{-12} \text{ m}^2$.

2. (Cancelled)

3. (Currently Amended) The method of claim 1, wherein the liquid is sequentially applied to different areas of a pond in a toilet bowl three or more times as a spray immediately prior to making the bowel movement.

4. (Currently Amended) The method of claim [[2]]1, wherein the liquid includes an enzyme.

5. (Currently Amended) The method of claim [[2]]1, wherein the liquid includes the enzymes amylase, protease, and lipase.

6. (Cancelled)

7. (Currently Amended) The method of claim [[6]]1, wherein the droplets are spherical.

8. (Original) The method of claim 7, wherein the spray is sprayed from a nozzle such that the spray has a conical pattern with an apex having a solid angle of about 40° at a spray originating region.

9. (Currently Amended) The method of claim [[2]]1, wherein the spray includes spherical droplets having a maximum diameter of about 0.0025 mm.

10. (Currently Amended) The method of claim [[2]]1, wherein the spray consists primarily of spherical droplets having a maximum diameter of about 0.0025 mm.

11. (Original) The method of claim 10, wherein the liquid includes an enzyme.

12. (Original) The method of claim 10, wherein the liquid includes the enzymes amylase, protease, and lipase.

13. (Currently Amended) ~~The method of claim 1,~~ A method of reducing the odor emanating from feces deposited by a human making a bowel movement in a toilet, comprising the step of applying a liquid deodorizer to the toilet immediately prior to making the bowel movement, wherein the liquid includes~~including~~ an enzyme.

14. (Currently Amended) The method of claim [[1]]13, wherein the liquid ~~includes the enzymes~~ are amylase, protease, and lipase.

15. (Original) The method of claim 14, wherein the liquid includes emulsifiers.
16. (Currently Amended) The method of claim 14, wherein the liquid includes nonylphenol, propylene glycol, and about 90% water by volume.
17. (Currently Amended) The method of claim 13, wherein the liquid is in the form of a spray ~~consists~~consisting of droplets having a maximum surface area of about $78 \times 10^{-12} \text{ m}^2$.
18. (Cancelled)
19. (Currently Amended) The method of claim ~~[[18]]~~17, wherein the droplets are spherical.
20. (Currently Amended) The method of claim ~~[[18]]~~17, wherein the spray is sprayed from a nozzle such that the spray has a conical pattern with an apex having a solid angle of about 40° at a spray-originating region.
21. (Original) The method of claim 17, wherein the spray includes spherical droplets having a maximum diameter of about 0.0025 mm.
22. (Original) The method of claim 21, wherein the spray consists primarily of spherical droplets having a maximum diameter of about 0.0025 mm.
- 23-28. (Cancelled)

29. (New) The method of claim 3, wherein the spray is sprayed from a nozzle such that the spray has a conical pattern with an apex having a solid angle of about 40° at a spray originating region.

30. (New) The method of claim 5, wherein the liquid includes nonylphenol, propylene glycol, and about 90% water by volume.

31. (New) The method of claim 20, wherein the liquid is sequentially applied to different areas of a pond in a toilet bowl three or more times as a spray immediately prior to making the bowel movement.

32. (New) The method of claim 13, wherein the liquid is sequentially applied to different areas of a pond in a toilet bowl three or more times as a spray immediately prior to making the bowel movement.

33. (New) The method of claim 4, wherein the liquid includes emulsifiers.

34. (New) The method of claim 4, wherein the liquid includes nonylphenol, propylene glycol, and about 90% water by volume.
